PROFESSIONAL SUMMARY

Go and Python backend engineer with 8 years of experience building payment and logistics services. Cut p95 API latency by 42% at a payments company and led its move from a monolith to services on AWS. Looking for a senior role where reliability and clear interfaces matter.

PROFESSIONAL EXPERIENCE

Senior Backend Engineer | Example Payments Inc. | 2021 – Present

- Rebuilt the transaction-ledger API in Go, cutting p95 latency from 310 ms to 180 ms (42%) while the service absorbed 3x peak traffic.
- Split a Python monolith into 6 services on AWS (ECS, RDS PostgreSQL), reducing deploy time from 50 minutes to 9.
- Added contract tests and canary releases, which brought rollbacks down from 11 per quarter to 2.
- Mentored 3 engineers; two were promoted within 18 months.

Backend Engineer | Sample Logistics Co. | 2017 – 2021

- Wrote route-planning services in Python that shortened average delivery estimates by 12%, using PostgreSQL window queries instead of an in-memory cache.
- Containerized 9 batch jobs with Docker, so any engineer could reproduce a failed run locally in minutes.
- Cut a nightly reporting job from 4 hours to 35 minutes by moving aggregation into the database.

CORE COMPETENCIES & TECHNICAL SKILLS

- **Languages:** Go, Python, SQL
- **Data & Cloud:** PostgreSQL, AWS (ECS, RDS, S3, SQS), Docker
- **Practices:** Contract testing, canary releases, code review, on-call incident response

EDUCATION

B.S. in Computer Science, Example State University, 2017

LANGUAGES

English (native), Spanish (professional)
